

LEMING LAKE SAND SECTION PROJECT

Overview

TC Energy's NGTL System delivers energy to millions of North Americans every day as an essential part of the TC Energy pipeline network. NGTL GP is proposing to construct, own and operate the Leming Lake Sales Lateral Loop (Sand Section) Project ("Project") to enhance natural gas transportation to meet growing demand in Alberta, providing secure and reliable energy. This Project will support natural gas delivery to the Oil Sands.

NGTL GP anticipates filing an application with the Canada Energy Regulator (CER) under Section 214 of the Canadian Energy Regulator Act in Q1 2025, with a commercial in-service date in Q2 2027.

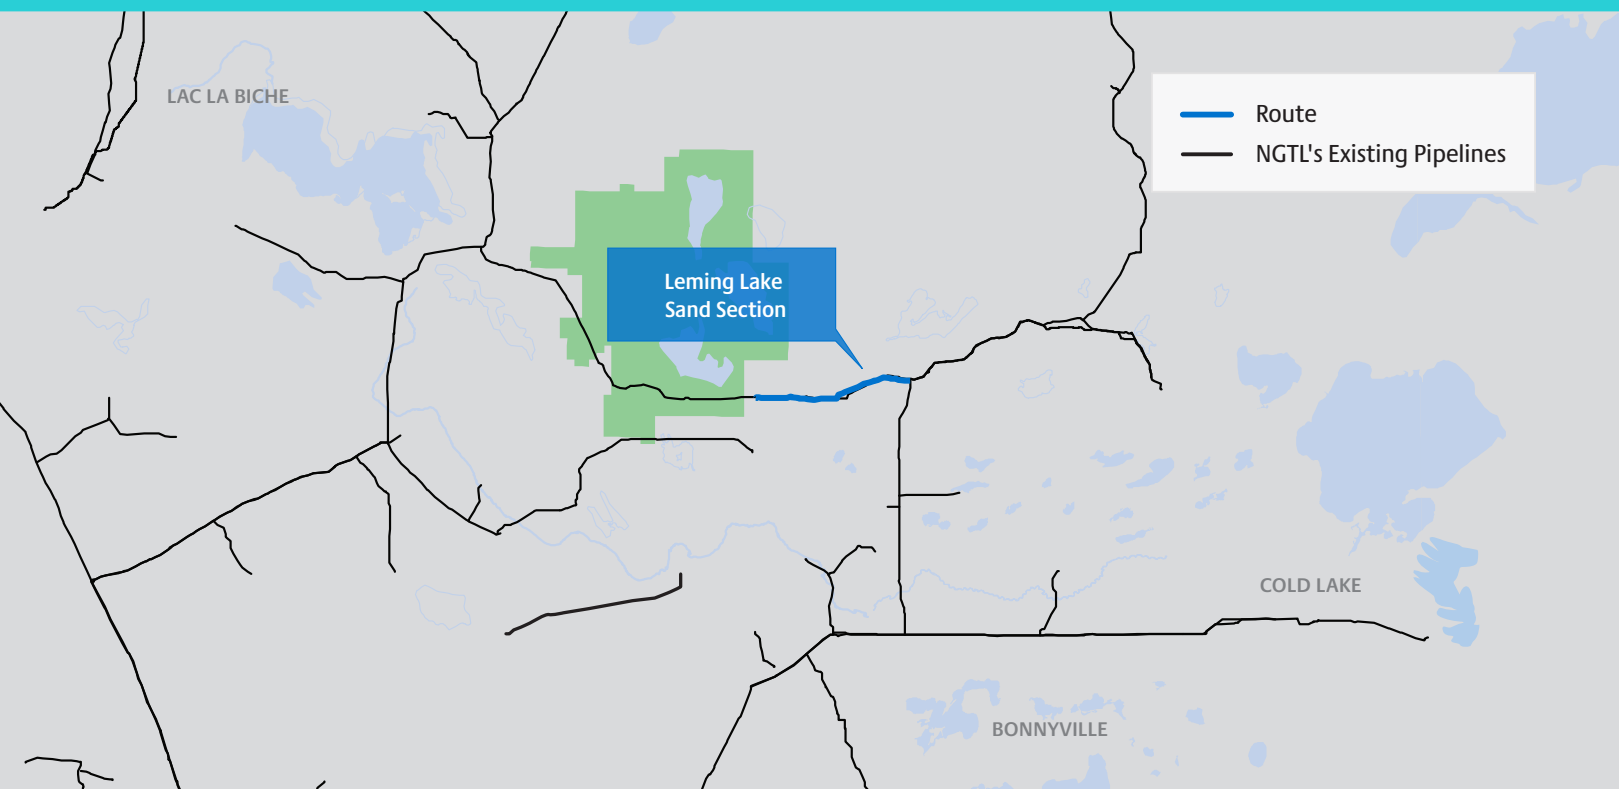

Project Scope

The proposed Sand Section consists of approximately 18 kilometers (km) of 20-inch diameter (NPS 20) located on Crown Land, beginning at SW-21-65-7-W4M and ending at NW-11-65-9-W4M, approximately 60 km northwest of Bonnyville, in the M.D. of Bonnyville No. 87.

Anticipated Project Schedule

Q3 2024	Engagement start
Q4 2024	Project notification submission to CER
Q1 2025	Section 214 Application filing to CER
Q4 2025	Early clearing work
Q4 2026	Construction start
Q2 2027	Commercial in-service

..... TC Energy periodically provides information beginning at the early stages of project development, including prospecting, and continuing throughout the life of assets. The information provided is intended to inform stakeholders and Indigenous groups of our proposed activities and provide the opportunity to provide meaningful input or feedback. As planning progresses and new information becomes available, details may change from the time of this printing.

Project Benefits

The proposed Project will deliver well-designed and constructed infrastructure that provides short- and long-term economic benefits and also strengthen the economy at a local, provincial and national level:

Employment opportunities - Construction will require the services of equipment operators, welders, mechanics, truck drivers, labourers and more.

Business opportunities - Pipeline construction will create demand for local goods and services, including food and accommodation, hardware, industrial parts, automotive parts and servicing, fuel and more.

Investment in local communities - Through our engagement with local communities, we will identify areas where we can help build stronger, more vibrant communities through initiatives with community partnerships in the areas of safety, community and environment.

Annual revenue to support local services - Project construction will result in tax payments to municipal, provincial and federal governments. When the Project is operational, annual tax payments will help support schools and hospitals, emergency services, recreation facilities, recycling programs and other local programs vital to sustaining communities.
